We simplify the complex

National Inflation

Current annual inflation rate is 3.46% and monthly is 0.31%.

Annual vs. Monthly

Market Review

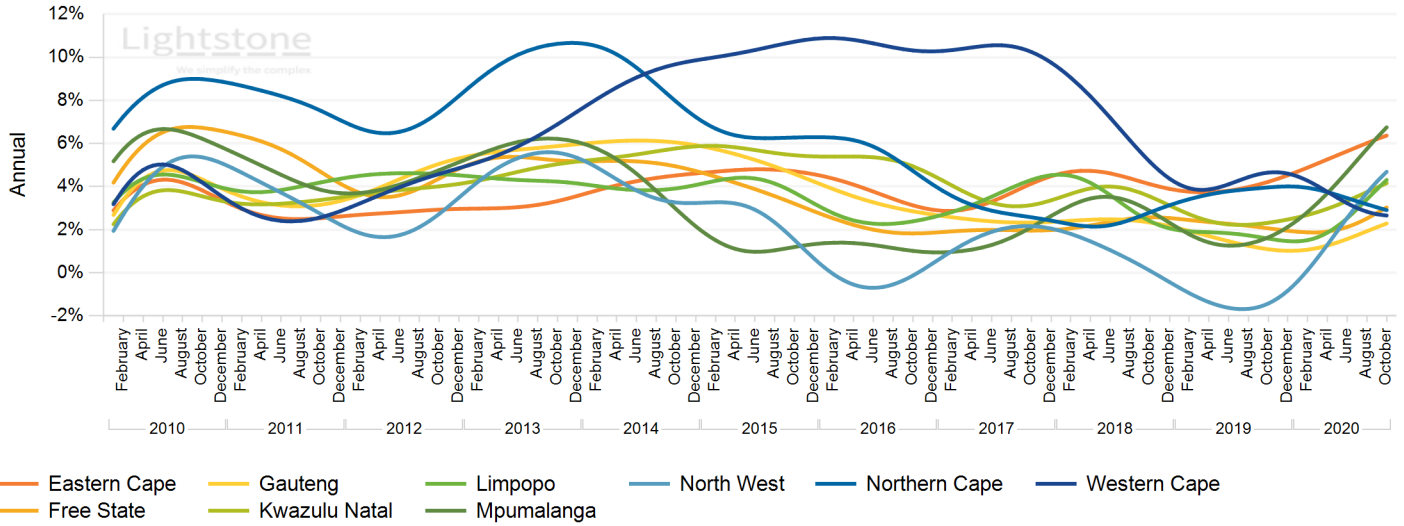

National house price inflation was 3.5% as at the end of January 2021. Contrary to expectations housing prices did not crash during the year. In fact, the property market recovered as shown by the value bands except for the Low value market which has seen some correction.

At this point it is difficult to point to the exact reason for the increase in the higher value segments and the decrease of the low value segment. One reason for the growth in the higher value segments could be the exceptionally low interest rate increasing the demand, whereas the low value segment which is more dependent on economic growth has taken a big hit from the currently sluggish economy.

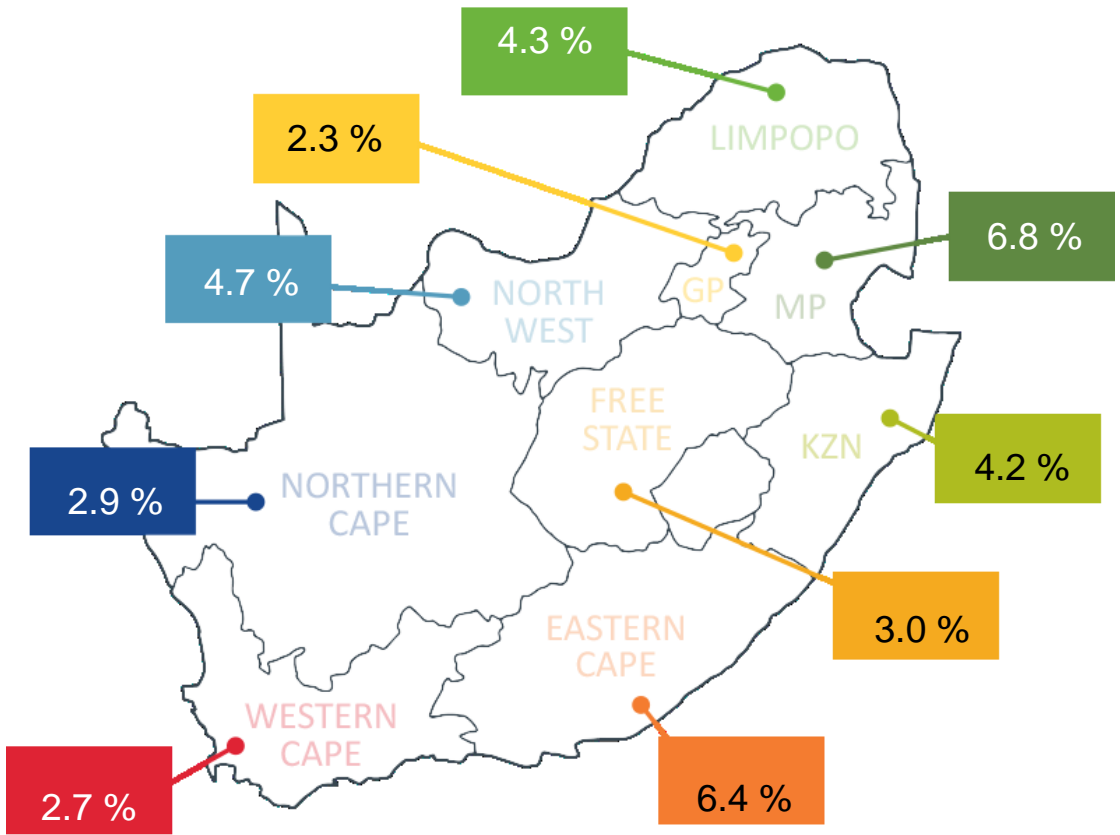

Provincial Inflation

The Lightstone Provincial Index tracks annual inflation of all provinces in South Africa.

Annual Inflation: Provinces

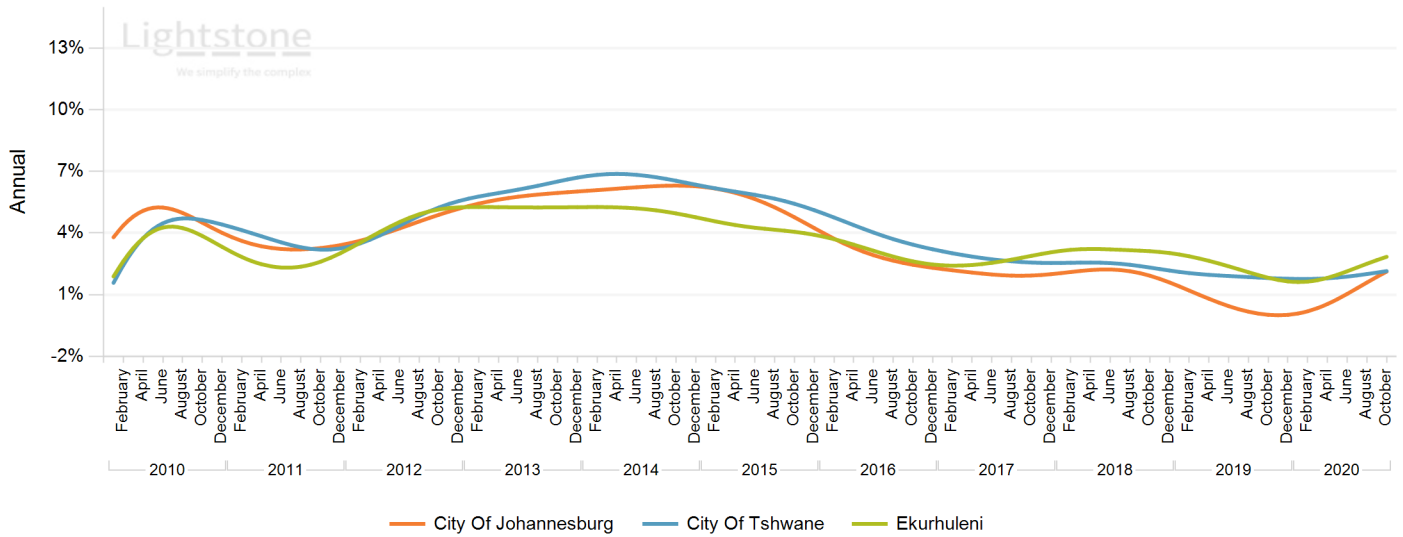

Latest/Current Provincial Inflation Status

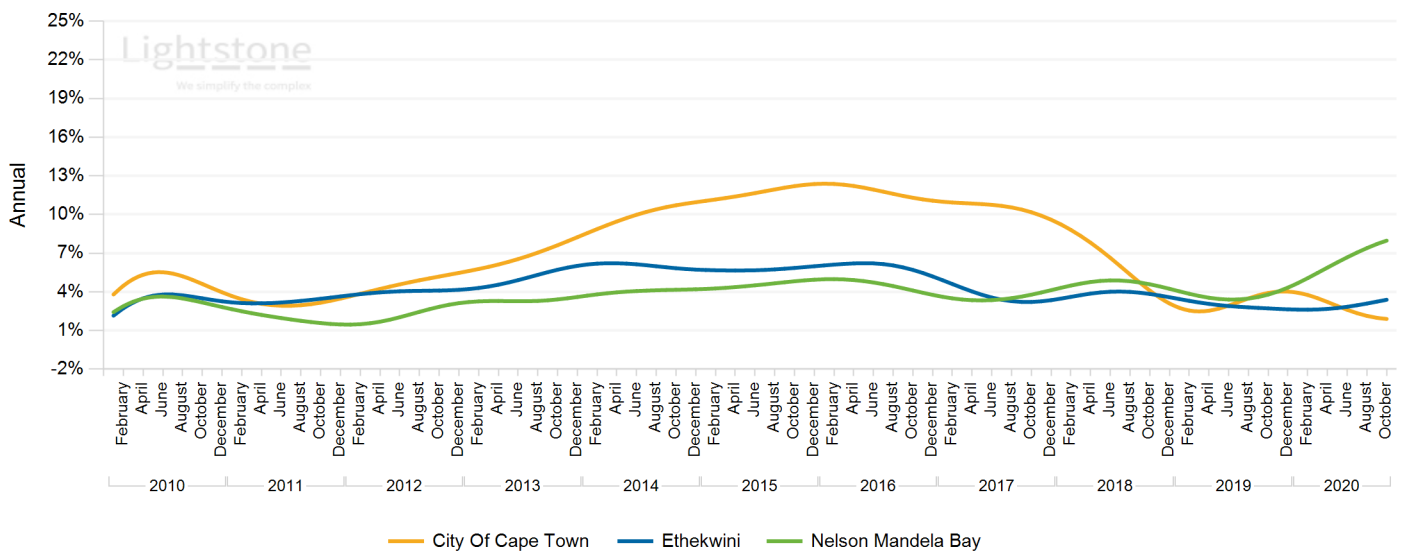

Municipal Inflation

The Lightstone Municipal Index tracks annual inflation at a municipal level, with coastal and inland based municipalities reviewed independently.

Annual Inflation: Inland Municipalities

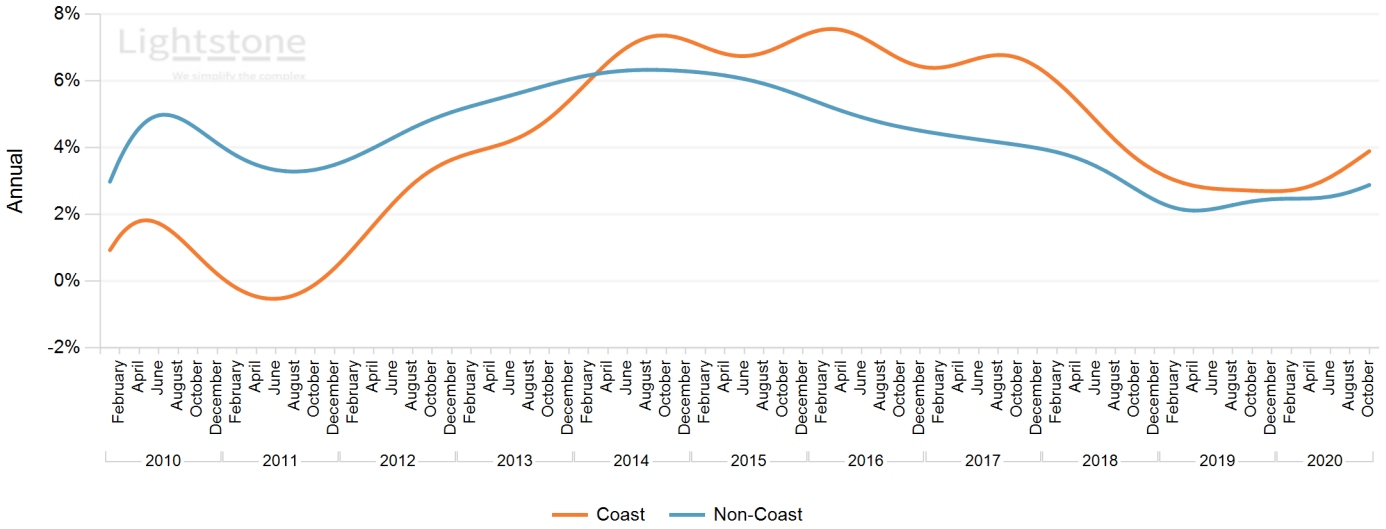

Annual Inflation: Coastal Municipalities

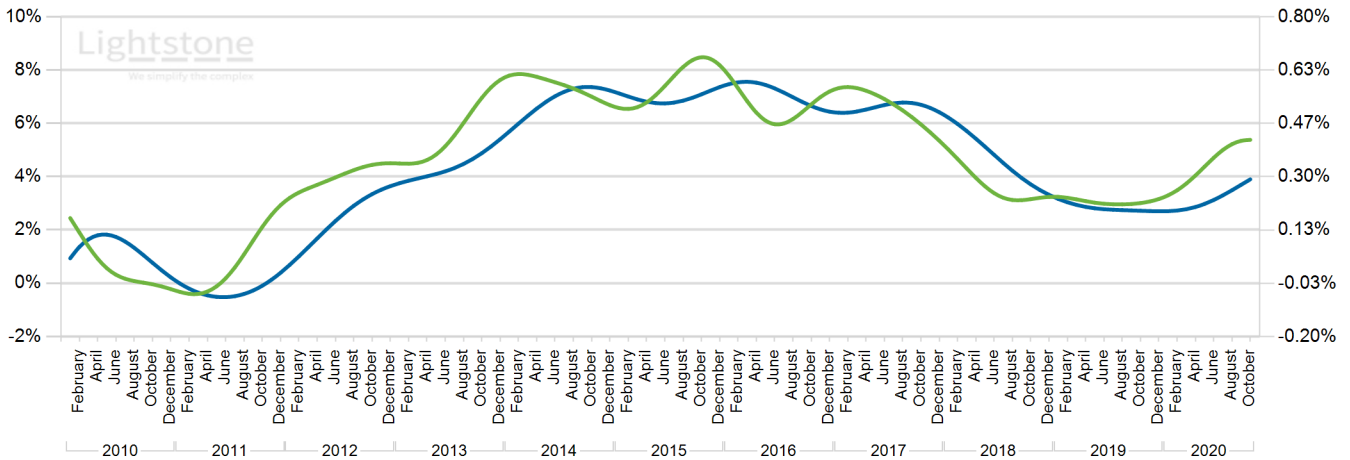

Property Inflation: Coast vs Non-Coast

The Lightstone Coast vs Non-Coast Index compares property located within enumerator areas 500m of the coastline to those located further inland.

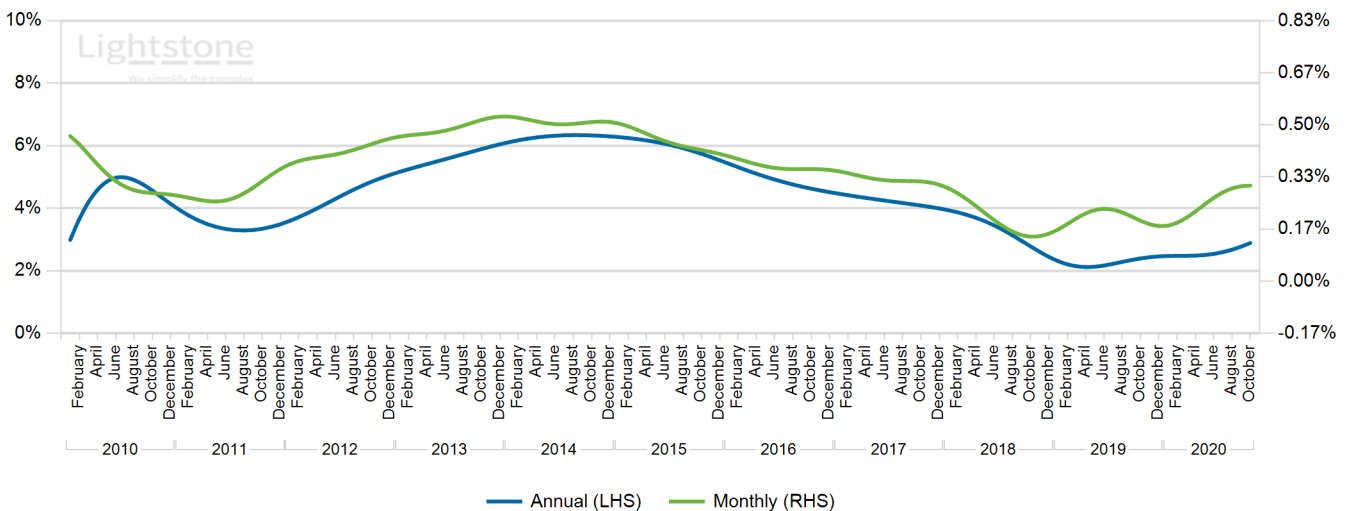

Annual Inflation: Coast vs Non-Coast

Coast: Annual vs Monthly Inflation

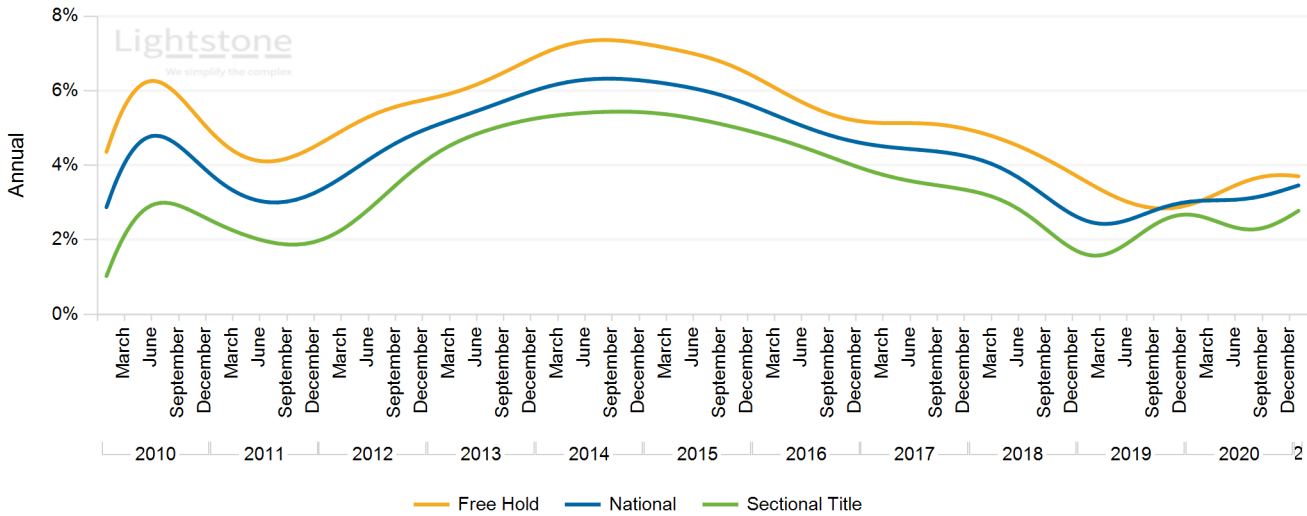

Non-Coast: Annual vs Monthly Inflation

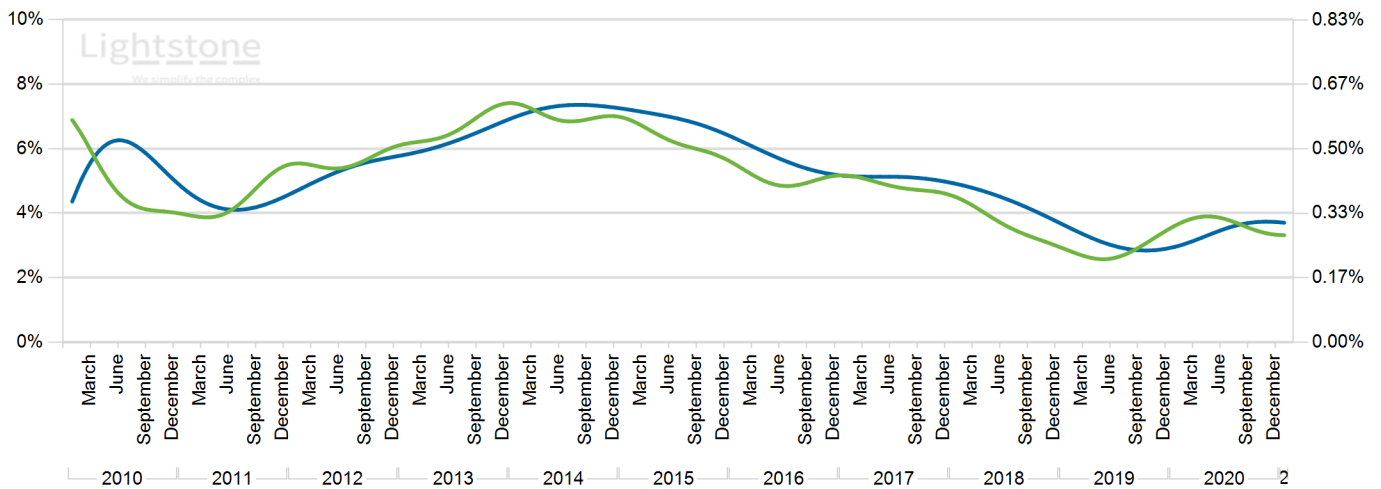

Property Inflation: Free Hold vs Sectional

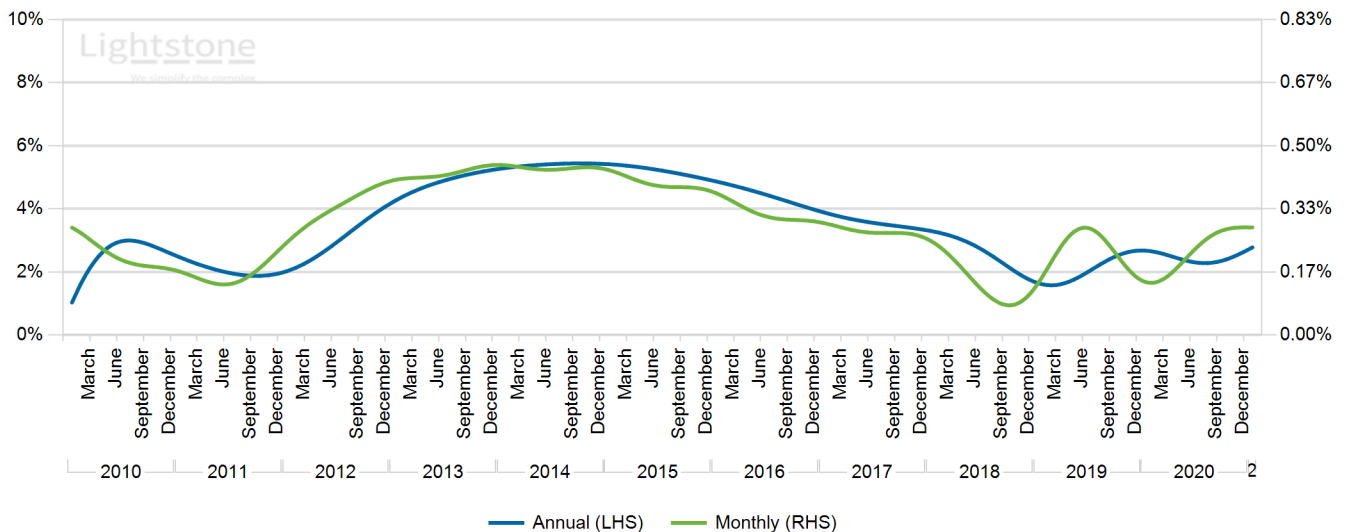

Annual Inflation: Free Hold vs Sectional Title Properties

Freehold Property: Annual vs Monthly Inflation

Sectional Title: Annual vs Monthly Inflation

Property Inflation: Value Bands

The Lightstone Area Value Bands Index reviews inflationary rates for property based on the following values.

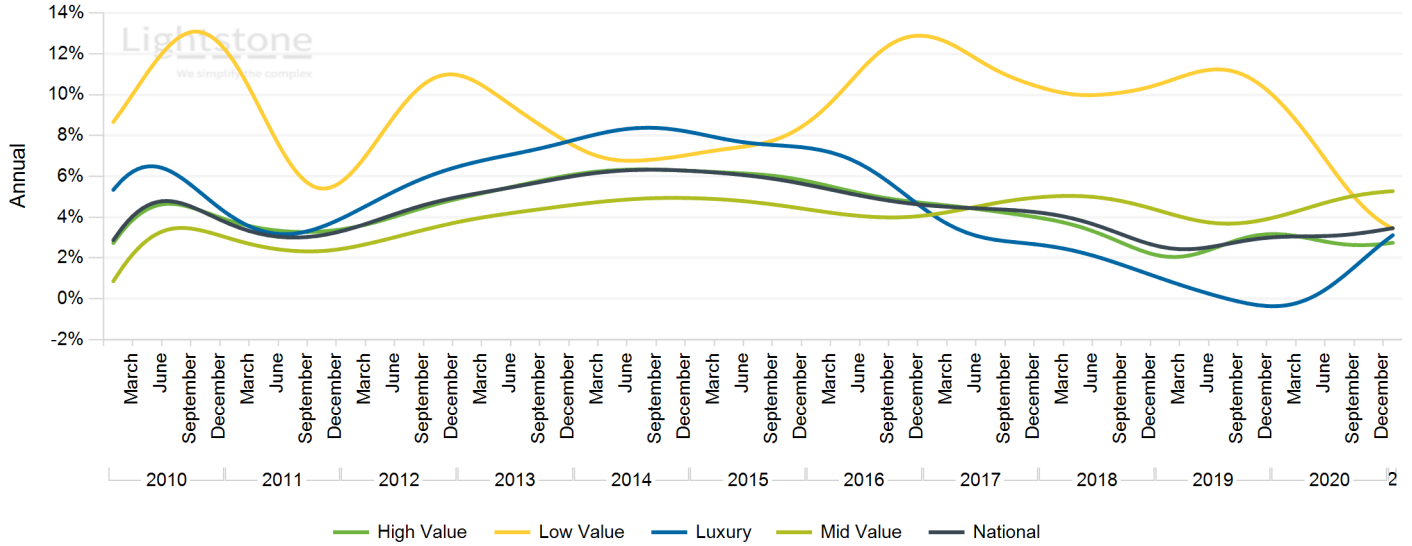

Luxury: > R1.5mil

High Value: R700k to R1.5mil

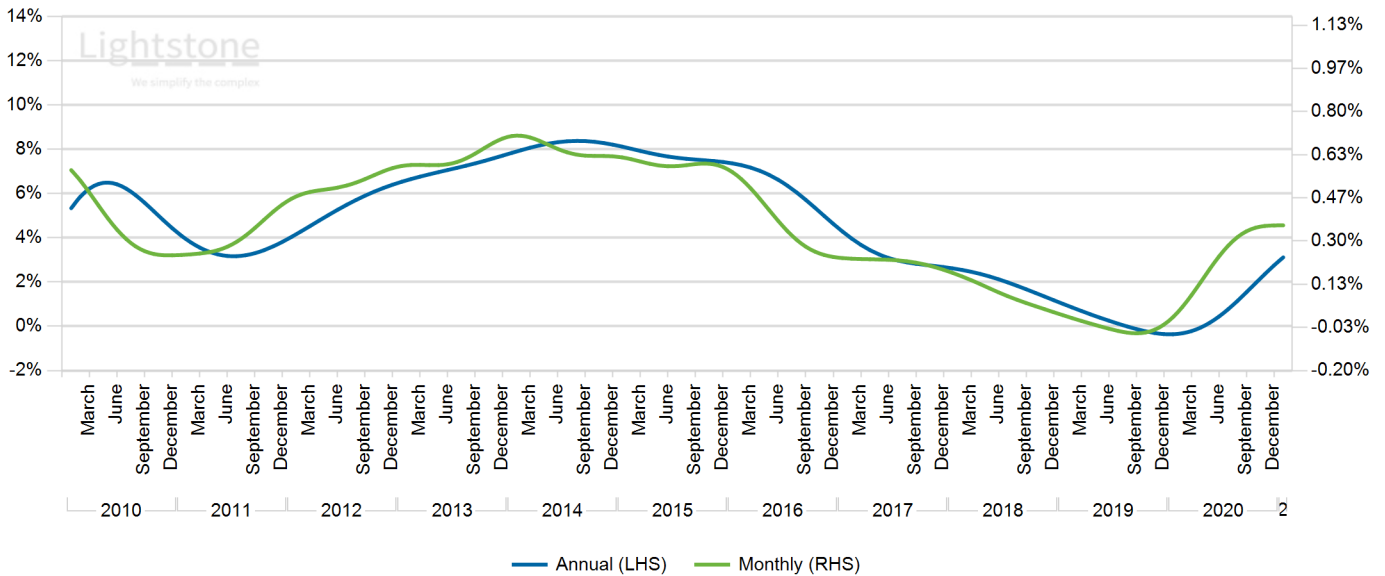

Mid Value: R250k to R700k

Low Value: <R250k

Annual Inflation: Area Value Bands

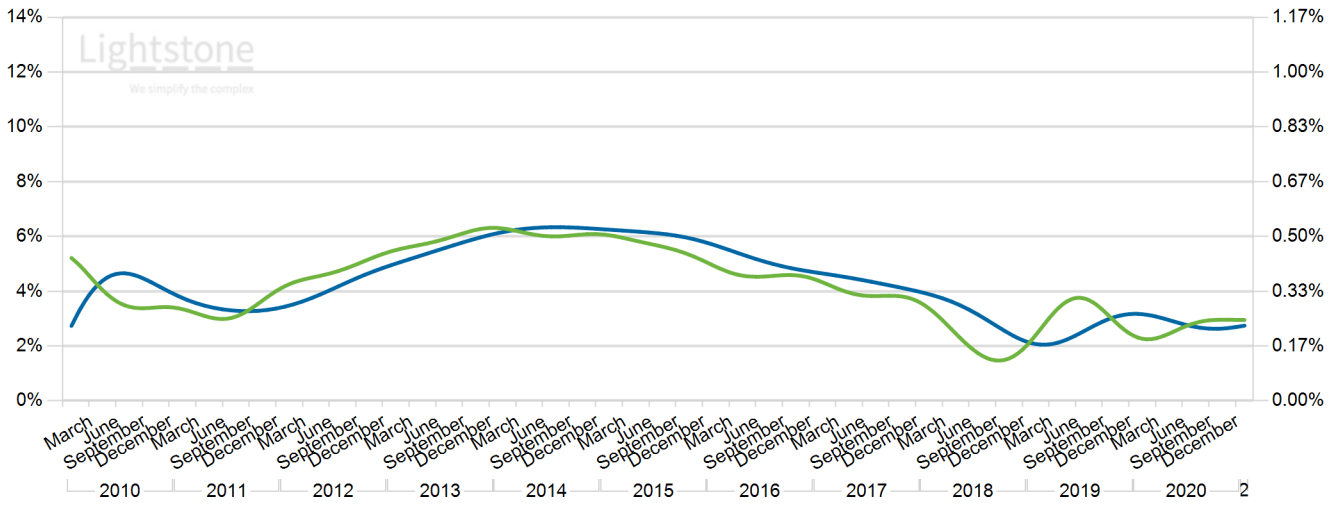

Annual vs Monthly Inflation: Luxury Property

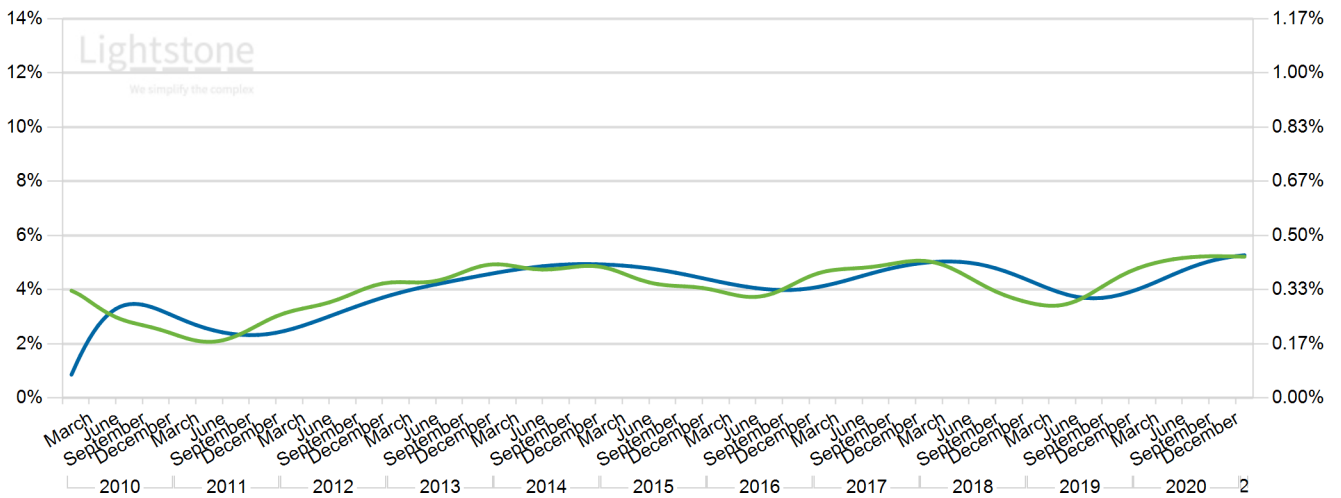

Property Inflation: Value Bands (continued)

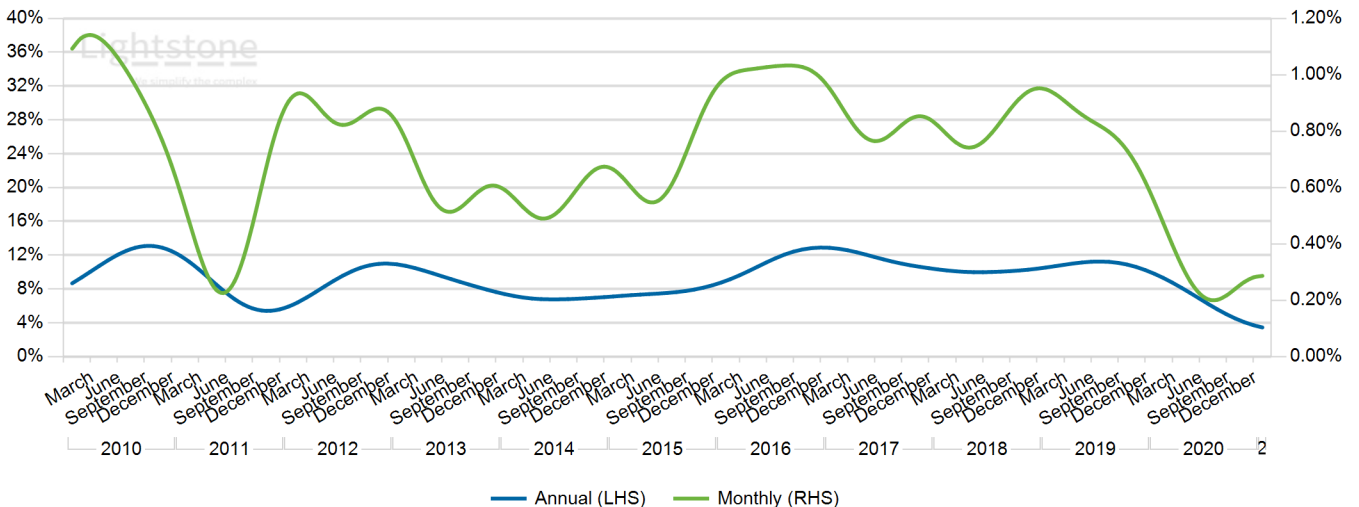

Annual vs Monthly Inflation: High Value Property

Annual vs Monthly Inflation: Mid Value Property

Annual vs Monthly Inflation: Low Value Property

— Annual (LHS) — Monthly (RHS)

Inflation Table

The Annual Inflation Table (below) provides a long term view of annual rates of inflation for various geographical areas and property types. Please note that historic inflation rates can change as transactions occur that imply price inflation for those periods.

		2015	2016	2017	2018	2019	2020						2021

Shining A Light On Our Approach...

Methodology:

Lightstone applies the repeat sales methodology when reviewing and reporting on property data. In contrast to 'average house price' indices, repeat sales indices provide a measure of the actual price inflation of houses that have transacted twice within a particular period of time. The main benefit of this is that it is less influenced by the mix of transacting properties. The repeat sales methodology is recognised as the premier methodology for indexing house prices and is used by many international residential property price indexers including the Office of Federal Housing Enterprise Oversight (OFHEO) in the United States.

Data:

All property transactions in South Africa are registered in the Deeds Office and each record contains the legal details of both the property and the transaction. For the purposes of the Repeat Sales Index for residential properties, the following transactions have been excluded: farms; any transactions which may be of a development, commercial or community services nature; new developments; sales made in execution of a judgement; non-arms-length transactions; transactions where the inflation is extremely different to the norm of the statistical distribution of inflation rates; and township transactions.

Caution:

Lightstone presents both annual and monthly inflation rates. Monthly inflation emphasises recent market performance (i.e. month on month) and is more volatile than annual inflation trends. Conclusions about the future trend of annual inflation, based on monthly inflationary rates, must be made with caution.

Disclaimer:

The Lightstone Repeat Sales Index system applies advanced statistical methods to a comprehensive property database - compiled from the Deeds Office, the Surveyor General and other sources - to generate repeat sales inflation data for individual residential properties. Despite the statistical and actuarial rigour applied, Lightstone cannot guarantee the accuracy and reliability of the data. Furthermore, the index is a statistical tool and does not amount to advice and may not be applicable in some cases. Lightstone does not take responsibility for any losses incurred as a result of any person acting or omitting to act as a result of the publication of this index.
